

Redesign the Misleading Colored Chart

R.No: 19 Reg. No: 192325068 Name: KOMMA AKHILESWARA REDDY

Each chart below uses color in a misleading or confusing way. For each one, answer the three questions in your own words.

Chart 1

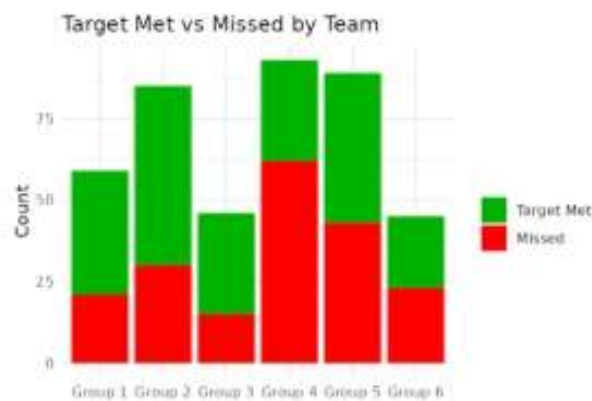

1. What is this chart trying to show?

2. What's wrong with the color choice?

3. Propose a better color scheme (describe it in words):

Chart 2

1. What is this chart trying to show?

2. What's wrong with the color choice?

3. Propose a better color scheme (describe it in words):

03-10-2026

Class - Activity - 2

Roll No: 19

Name: K. Akhileswara Reddy

Coursecode: DSA0601

Regno: 192325068

Chart - 1 - Survey Response - Response counts

1) What is this chart trying to show?

The chart represents the number of surveys responses received from people belonging to four experience levels: Beginner, Intermediate, Advanced and Expert.

2) What's wrong with the color choice?

The colors are too bright & unrelated to the categories. Using different strong colors can make the viewer think the categories have different meanings or importance.

3) Propose a better color scheme?

Use one consistent color for all bars, such as blue, with the same shade throughout. Alternatively, use light-to-dark shades of the same color to show the progression from Beginner to Expert.

Chart - 2 - Target Met vs Missed by Team

1) What is this chart trying to show?

It compares the number of targets met & targets missed by each team (Group 1 - Group 6).

2) What's wrong with the color choice?

The red & green colors create a strong good/bad impression & can be distracting, especially for viewers with color-vision deficiencies. The colors are also very saturated.

3) propose a better color scheme?

Use blue for Target Met & orange for missed, with softer, consistent shades. for example, use medium blue for "Target Met" & muted orange for "missed" so the two categories remain clearly distinguishable without overly strong visual emphasis.
